

#DSTL mini project

STEP 1: Load Data

1. Open **Power BI Desktop**
 2. Click **Home** → **Get Data**
 3. Select your dataset (Excel / CSV / OData if given)
 4. Click **Load**
-

STEP 2: Data Cleaning (IMPORTANT)

1. Go to **Transform Data (Power Query)**
 2. Check:
 - Date column → set as **Date type**
 - Sales, Profit → set as **Decimal Number**
 - Quantity → **Whole Number**
 3. Remove null values if any
 4. Click **Close & Apply**
-

STEP 3: Create Measures (VERY IMPORTANT)

Go to **Modeling** → **New Measure**

✓ Total Sales

```
Total Sales = SUM(Sales[Sales_Amount])
```

✓ Total Profit

```
Total Profit = SUM(Sales[Profit])
```

✓ Total Transactions

```
Total Transactions = COUNT(Sales[Transaction_ID])
```

✓ Profit %

```
Profit % = DIVIDE([Total Profit], [Total Sales]) * 100
```

STEP 4: Create KPI Cards (Top Section)

1. Go to **Report View**
2. Add **Card Visual**
3. Add these fields:
 - Total Transactions
 - Total Sales
 - Total Profit
 - Profit %

Format:

- Increase font size
 - Add titles
-

STEP 5: Total Quantity by Month & Sales Manager (Line/Area Chart)

1. Select **Line Chart**
2. Drag:
 - X-axis → Month
 - Y-axis → Quantity
 - Legend → Sales Manager

This creates the monthly trend (as shown in PDF)

STEP 6: Sales & Quantity by Sales Manager (Clustered Column Chart)

1. Select **Clustered Column Chart**
 2. Drag:
 - X-axis → Sales Manager
 - Values → Total Sales, Total Quantity
-

STEP 7: Profit by Product (Pie Chart)

1. Select **Pie Chart**
2. Drag:
 - Legend → Product
 - Values → Total Profit

Turn ON:

- Data labels (%)
-

STEP 8: Sales & Profit by Country (Bar Chart)

1. Select **Clustered Bar Chart**
 2. Drag:
 - Y-axis → Country
 - Values → Total Sales, Total Profit
-

STEP 9: Map Visual (Optional but shown)

1. Select **Map**
 2. Drag:
 - Location → Country
 - Size → Total Sales
-

STEP 10: Add Slicers (Filters)

Add slicers for:

- Year
- Product
- Sales Manager
- Month

Steps:

1. Click **Slicer Visual**
 2. Drag field (e.g., Year)
-

STEP 11: Format Dashboard (MAKE IT LOOK PRO)

- Apply **Theme** (View → Themes)
 - Align visuals properly
 - Use consistent colors
 - Add titles like:
 - "Total Sales by Country"
 - "Profit Analysis"
-

STEP 12: Final Touch

- Enable **Data Labels**
- Sort charts properly
- Add **Background** (light/dark)
